

## NEW HOME FOR BEES

University Erects 18 by 30 Foot Structure Near Poultry Building.

The department of entomology is erecting a house for keeping bees just west of the Poultry Building on the University farm. The new structure will be 18 by 30 feet, and will have two stories.

The top story of the building will be used for laboratory work in bee keeping. The first floor will be devoted to fumigating of nursery stock. The apiary now located on the East Campus will probably be moved to the new bee home, and all work in entomology will be done there.

## Realism Test

This makes an actual musical experience out of a demonstration of the New Edison. It brings back your previous musical experiences. You compare the present experience with your musical memories, and determine how listening to the New Edison compares with listening to the living artist.

Let us tell you, at the same time, about our Budget Plan—a "better business" way of paying for your New Edison. (Note: the New Edison has advanced in price less than 15% since 1914. This includes War Tax.)
